### **Ver Glow #1 Instructions**

**Ver Glow #1** is a natural, non-acid, non-wax, abrasive compound for the thorough cleaning and honing of older and/or worn **MARBLE floors, including floors with lippage which cannot be ground with diamonds or stones.** **Ver Glow #1** can also be used on LIMESTONE, TRAVERTINE, TERRAZZO etc.

**Ver Glow #1** is used to deep clean and hone (smooth) old and/or very worn stone surfaces.

**Ver Glow #1** will not remove lippage. It prepares the surface for polishing with **Ver Glow #2.**

To apply **Ver Glow #1**, you need:

1. **Ver Glow #1**
2. Floor buffer (175 to 350 RPM) equipped with a water tank and splash guard.
3. One natural hair pad, one white buffing pad. Note: A heavier buffer will give you a quicker and better result. We recommend an optimum weight of 125/130 lbs.
4. Wet vacuum clean, mop, bucket, wringer, floor squeegee.

#### **Directions:**

**Note: The stone should be stripped of all waxes or sealer and neutralized.**

- a. Cover baseboard, carpet, etc., with protective plastic and/or tape.
- b. Wet the stone surface. Sprinkle a handful of **Ver Glow #1** on the wet surface (5oz./25 Sq. Ft.)

- c. Buff the **Ver Glow #1** slurry with a natural hair pad for about 10 minutes per 25 Sq. Ft.
- d. Squeegee the **Ver Glow #1** mixture to the adjacent area and repeat the process.
- e. Add **Ver Glow #1** and water as needed.
- f. Vacuum-dry thoroughly, damp mop and let dry.
- g. If needed, polish the marble with Ver Glow #2.

### **Technical Specifications**

Active Ingredient: Aluminum Oxide  
Productivity: 100-150 Sq. Ft. / hour  
Contains no acid.

For further technical specifications see Safety Data Sheet.  
Store in a Dry Place.
